

Brinkley Knows... Vehicle Identification Numbers (VINs)

Answers to frequently asked questions from our Customer Care staff

REV-A

VEHICLE IDENTIFICATION NUMBER

Each Brinkley RV is assigned a 17-digit vehicle identification number also referred to as the “VIN.” This identification number is located on the VIN tag which can be found on the A-frame of a travel trailer or the hitch (also known as the pin box) on fifth wheels. As a secondary location, the VIN can also be found on the Federal Certification Label.

The last seven (7) digits of the VIN are also known as the RV serial number. For example, using the supplied VIN below, the serial number would be G000001.

Please see the typical de-coding of a Brinkley RV VIN below:

SAE WORLD
IDENTIFIER:

7T0 – BRINKLEY RV

CLASS:

F = FIFTH WHEEL
